EDUCATION

New Jersey Institute of Technology — Expected May 2029
Bachelor of Science in Data Science & Statistics | Minor in Innovation & Entrepreneurship — GPA: 4.0

- **Relevant Coursework:** Data Structures and Algorithms | Regression Analysis | Programming Language Concepts | Discrete Math for CS | Probability Theory | Statistical Methods | Linear Algebra | Multivariable Calculus | Anatomy and Physiology | AP Biology
- **Honors & Awards:** Albert Dorman Honors Scholar | Full Merit-Based Scholarship | Best Beginner Hack, GirlHacks 2025 (1st/18 Teams) | Peer Recognition Award for Pitch Poster (1st/143 Projects) | Santander Entrepreneurial Scholar | Avanade NextGen STEM Scholar 2026

Cornell University: Machine Learning Foundations e-Certificate, Break Through Tech — May – August 2026

Colonia High School — June 2025
Valedictorian (Rank 1/364) | SAT: 1530 (M: 790, EBRW: 740) — GPA: 4.28/4.33

PROFESSIONAL EXPERIENCE

Cornell Tech — Remote / New York, NY
Break Through Tech (BTT) AI Fellow — May 2026 – Present

- Selected for a competitive 12-month technical AI/ML fellowship from a pool of 4,400+ applicants; completed 135+ hours of hands-on curriculum in supervised machine learning, deep learning, RAG, and generative AI
- Engineered an end-to-end data preprocessing pipeline across 28k+ imbalanced NYC listings using Python, NumPy, Pandas, and Scikit-learn, integrating feature selection, categorical encoding, and scaling; built Logistic Regression and TensorFlow/Keras neural networks
- AI Studio Project: Collaborating with 3 fellows, under the guidance of an industry product leader, to estimate the incremental impact of an advertising campaign on customer visits using uplift modeling, framed as a privacy-conscious retail media measurement problem

New Jersey Institute of Technology — Newark, NJ
Computational Biophysics Undergraduate Researcher - Honors Summer Research Institute — January 2026 – July 2026

- Engineered Python ML frameworks using TensorFlow & computational simulations to model intestinal mucus and extract properties
- Created statistical data visualizations, and validated Nernst-Planck ionic transport models against published literature (Lewis et al.), simulating concentration gradients for H+, HCO3-, and ions across the mucosal layer – with implications to gastrointestinal health
- Collaborated in a 4-person team via Google Colab under faculty mentorship, attending weekly workshops to synchronize research; secured 1st Place out of ~20 projects at the Honors Research Forum and presented at the Undergraduate Research and Innovation symposium

Colonia High School — Colonia, NJ
Independent Student Researcher — September 2021 – June 2025

- Conducted 4 year-long lab-based projects; authored 3 formal research papers; presented findings across 7 STEM symposia
- Tested antibubble stability and simulated soft gel capsule breakdown in 7 varying pH levels to determine optimal dissolution conditions
- Statistically analyzed experimental datasets in Google Sheets; won 2nd Place & Founders Award at the 2025 Terra NJ STEM Fair

PROJECTS

AtheneumOfTongues^3 (Language Learning Web App) — Newark, NJ
Backend Developer (Team of 4), HackRU 2026 | GitHub — October 2026

- Co-developed a web application that turns media into language-learning opportunities
- Implemented a Python FastAPI backend with Pydantic schemas, enabling a Next.js client to ingest media and request translations
- Built media ingestion that extracts text from PDF and TXT uploads and scrapes article URLs, returning structured extracted text for the reader; integrated the Gemini API for word/phrase translation using tight JSON prompts, in-memory caching, and a low token limit

LEADERSHIP & INVOLVEMENT

Women in Computing Society & GirlHacks — Newark, NJ
Secretary & Internal Operations Chair — March 2026 – Present

- Direct internal operations, compliance, biweekly newsletters, and records for a 600+ member organization
- Build and maintain centralized tracking systems (excel sheets, attendance dashboards, and operational timelines) to eliminate communication bottlenecks across an executive team
- Spearheaded GirlHacks onboarding pipelines and essential forms for registration, check-in, and confirmations across 450+ applicants, driving a 75% active confirmation rate through well-structured emails; visualized impact metrics via google sheets data visualizations

Bukas Loob Sa Diyos & St. Anne's Church — Newark, NJ
District Youth Coordinator (2025) & Weekly Lead Cantor/Pianist — January 2025 – Present

- Managed event logistics and operations for 18 bi-weekly congregational gatherings, monthly large-scale events, and 2 major retreats; directed and coordinated a cross-functional team of 50+ volunteers
- Led weekly planning sessions with a 5-person lead team to execute mission-aligned initiatives and programs
- Designed data-informed Instagram content and Discord channel announcements to boost community engagement

SKILLS

- **Languages & Tools:** Python, Microsoft 365 (Word, Excel), Java, R, MATLAB, HTML/CSS, Git/GitHub, Google Colab, Canva
- **Libraries & Frameworks:** NumPy, Pandas, Scikit-learn, TensorFlow, Keras, Matplotlib, Seaborn, SciPy
- **Core Competencies:** Data Visualization, Statistical Analysis, Supervised Learning, Deep Learning, Exploratory Data Analysis (EDA), Hyperparameter Optimization, Feature Engineering, Data Structures & Algorithms
- **Interests:** A Cappella (Gigabeats NJIT), Musical Theater, Marching Band, Saxophone & Piano, Entrepreneurship, Healthcare
